

Marine Science Summer Courses in Bermuda

The Bermuda Institute of Ocean Sciences (BIOS) offers a range of university-level summer courses designed to immerse students in a program of coursework and research that is unique in marine science education.

BIOS has access to a diverse array of subtropical marine and oceanic habitats which, combined with lectures, discussions and integrated field work and laboratory exercises, provide an optimal environment for experiential learning.

Previous summer courses have included:

- Coral Reef Ecology
- Modern Observational Oceanography
- Marine Plankton Ecology
- Ecology of Reef Fish
- Global Climate Change
- Marine Genomics
- Marine Pollution and Ecotoxicology
- Microbial Oceanography
